

**PROPOSED AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

CLAIM 1. (CURRENTLY AMENDED) An apparatus that attaches to the underside of ski boots that assists walking while wearing ski boots, comprising:

- a. ~~a roughly flat-bottomed footbed~~ being roughly flat from heel to toe made from resiliently elastic material that adds springiness to the walking motion; and
- b. an attachment means at the front and rear of said footbed for removably attaching said footbed to the underside of ski boots, said attachment means further comprising:
  - c. a connectedly-attached clip at one end of said footbed which engages the front or rear edge of the sole of a ski boot; and
  - d. a connectedly-attached lip of rigid material on the inside opposite end of said footbed, opposite said clip, which fits over the upper edge of the end of a ski boot's sole; and,
- e. said footbed being capable of flexing and returning to its original shape such that said clip and said lip can be attached over, and removed from, said upper edge of said ends of a ski boot's sole.

CLAIM 2. (CANCELED)

CLAIM 3. (CANCELED)

CLAIM 4. (CANCELED)

CLAIM 5. (CURRENTLY AMENDED) An apparatus that attaches to the underside of ski boots that assists walking while wearing ski boots, comprising:

- a. a footbed made from resiliently elastic material that adds springiness to the walking motion, said resiliently elastic material comprised of one or more members of elastomeric material connectedly attached together; and
- b. said footbed being roughly flat from heel to toe; and
- c. said footbed having an attachment means for removably attaching said footbed to the underside of ski boots; and
- d. said footbed being capable of flexing and returning to its original shape such that said attachment means can attach and unattach from said underside of said ski boots, and
- e. an elastomeric tread connectedly attached to the ~~roughly flat~~ underside of said footbed, which provides traction while walking.

CLAIM 6. (CANCELED)

CLAIM 7. (CANCELED)

CLAIM 8. (CURRENTLY AMENDED) The apparatus, as in Claims 1, 2, 4, or 5, 6 ~~or 7~~, said attachment means further comprising:

- a. a clip at one end of said footbed which engages the front or rear edge of the sole of a ski boot; and
- b. a lip of rigid material on the inside opposite end of said footbed, opposite said clip, which fits over the upper edge of the end of a ski boot's sole.

CLAIM 9. (CURRENTLY AMENDED) The apparatus, as in Claims 1, 2, 4, or 5, 6 ~~or 7~~, said attachment means further comprising a rigid heel cup and a rigid toe

cup each connectedly attached to said foodbed at each end of said footbed, said cups capable of fitting around the protruding ends of a ski boot sole and gripping said ski boot sole.

CLAIM 10. (CANCELED)

CLAIM 11. (CANCELED)
